17	yes	Dec 14, 2011 9:47 PM
18	The team is Cedar River focused. It would be helpful if other portions of the WRIA 8 watershed received similar focus. The habitat loss is still on going and recovery was based on no more habitat loss. Since that hasn't happened we are no closer to recovery than we were prior to the listing, in fact one might argue we have fallen further away from recovery. Team efforts should increase pressure on regulatory and planning actions to ensure no more habitat is lost.	Dec 14, 2011 4:32 PM
19	No, Additional attention needs to be put towards outreach and education and Regulatory updates.	Dec 14, 2011 3:09 PM
