

Amended WRIA 8 Technical Committee Recommendations – 2015 Additions to the Three-Year Work Plan Project List

At the March 19th Salmon Recovery Council meeting, the Council approved the addition of five projects to the WRIA 8 Three-Year Work Plan. The Three-Year Work Plan identifies the near-term projects and programs needed to advance WRIA 8’s salmon recovery strategies, and projects are added to the Work Plan as they elevate in priority.

Following the March Salmon Recovery Council meeting, the acquisition of the Wayne Golf Course in Bothell was identified as a Three-Year Work Plan candidate. The WRIA 8 Technical Committee discussed the acquisition at its May 6th meeting, and they found this protection project to be consistent with the recovery objectives for the Sammamish River and recommend its addition to the WRIA 8 Three-Year Work Plan. This recommendation is, in turn, proposed as an amendment to the Salmon Recovery Council approval issued on March 19th.

Three-Year Work Plan Additions Approved on March 19

Project Name	Project Sponsor	Location in Watershed	Technical Committee Recommendation
Meadowdale Beach Park Barrier Removal	Snohomish County	Nearshore Sub-Reach 9.04 (Tier 1)	Add project M228 to Start List and Three-Year Work Plan
