RE: Lake Washington/Cedar/Sammamish Watershed (WRIA 8) Salmon Recovery Council State Legislative Priorities

«GreetingLine»

On behalf of the Lake Washington/Cedar/Sammamish Watershed (WRIA 8) Salmon Recovery Council, I wish to share our enclosed priorities for the upcoming state fiscal biennium. Your leadership is critical to ensuring we can continue our efforts—and Washington State’s commitment—to protect and restore habitat for salmon listed as threatened under the Endangered Species Act. Additionally, salmon habitat restoration supports local economies and construction jobs, provides local community benefits, and makes ecosystems more resilient to potentially changing future conditions.

The state’s investment in salmon recovery and Puget Sound ecosystem restoration for the 2015-2017 biennium is permitting watersheds and the region to make significant progress on our highest priorities. Legislative support for the *Puget Sound Acquisition and Restoration* and *Salmon Recovery Funding Board* programs helps enhance our science-based salmon recovery efforts and implement priority habitat restoration and protection projects. The *Floodplains by Design* program is advancing implementation of multiple benefit projects that restore salmon habitat, reduce flood hazards, and improve water quality. Thank you for supporting these programs.

Salmon continue to be in trouble, but we are making important progress. We encourage you to build on the progress and momentum for salmon recovery and watershed health in Puget Sound and statewide. Attached are the WRIA 8 Salmon Recovery Council’s priorities for the 2017-2019 biennium. Specifically, we ask that you support the following:

- \$55.3 million in general obligation bonds for the *Salmon Recovery Funding Board* in the Recreation and Conservation Office budget, which funds habitat protection and restoration projects statewide.
- \$80 million for the *Puget Sound Acquisition and Restoration* program in the Recreation and Conservation Office budget, which will fund a prioritized list of large salmon recovery projects around Puget Sound and will provide funding to each Puget Sound watershed for critically important habitat projects.
- \$70 million for the *Floodplains by Design* capital budget request through the Department of Ecology, which will support a prioritized list of multi-benefit floodplain projects around the state that protect public health and safety while also enhancing salmon habitat.

«GreetingLine»

1/18/2017

Page 2 of 2

- \$907,000 for the **Lead Entity program** from the state general fund in the Recreation and Conservation Office budget. Lead Entities perform an essential function to salmon recovery in Washington, garnering local support for projects, prioritizing projects to maximize the public's investment, and ensuring investments in salmon recovery are scientifically-valid and efficient.
- \$2.72 million for **Washington's Wild Future** capital funding request in the Department of Fish and Wildlife's budget, which seeks to increase fishing opportunities and includes \$290,700 for Lake Washington Sockeye and Chinook Conservation that will continue monitoring predation and other factors limiting salmon survival in Lake Washington.

WRIA 8 appreciates the challenges involved in making state budget decisions and applauds your leadership. Thank you again for your work to continue Washington State's commitment to salmon recovery and restoring the health of Puget Sound.

If you have any questions about projects funded in WRIA 8 or how these priorities advance our salmon recovery objectives, please feel free to contact Jason Mulvihill-Kuntz, the Lake Washington/Cedar/Sammamish Watershed Salmon Recovery Manager, at 206-477-4780 or jason.mulvihill-kuntz@kingcounty.gov. Thank you for your consideration.

Sincerely,

Andy Rheahme
Chair, WRIA 8 Salmon Recovery Council
Mayor, City of Bothell

Enclosure

NOTE: This letter was sent to all legislators in the following legislative districts: 1, 5, 11, 21, 32, 36, 37, 38, 41, 43, 44, 45, 46, 48, as well as the Chairs and Vice-Chairs of the Senate Ways and Means Committee, Senate Energy, Environment, and Telecommunications Committee, House Capital Budget Committee, and House Environment Committee.

cc: Sheida Sahandy, Director, Puget Sound Partnership
Kaleen Cottingham, Director, Washington State Recreation and Conservation Office
Maia D. Bellon, Director, Washington Department of Ecology
Jim Unsworth, Director, Washington Department of Fish and Wildlife
Justin Parker, Executive Director, Northwest Indian Fisheries Commission
David Troutt, Chair, Washington State Salmon Recovery Funding Board
Amy Hatch-Winecka, Chair, Washington Salmon Coalition
Lake Washington/Cedar/Sammamish Watershed Salmon Recovery Council members
Jason Mulvihill-Kuntz, Lake Washington/Cedar/Sammamish Salmon Recovery Manager

2017 Legislative Priorities for Puget Sound Watershed Health and Salmon Habitat Recovery

*Lake Washington/Cedar/Sammamish Watershed
(WRIA 8) Partners*
Updated: January 2017

State Priorities

Capital Budget

Support the Puget Sound Partnership's original PSAR funding request of \$80 million for the 2017 – 2019 biennium (contained in the Recreation and Conservation Office budget). PSAR funds support implementation of the highest priority habitat protection and restoration projects throughout Puget Sound. The program includes: 1) base funding allocated among Puget Sound watersheds for a list of grant round habitat projects, and 2) funding for a prioritized list of specific, large-scale, high-priority capital projects submitted by Puget Sound watersheds. Funds are derived from State general obligation bonds (RCW 77.85). A small portion of this funding also supports local watershed development of priority projects.

- **Support the Recreation and Conservation Office's (RCO) original state capital funding request for the Salmon Recovery Funding Board of \$55.3 million for the 2017 – 2019 biennium.** SRFB funds consist of federal PCSRF dollars and state capital funds that serve as the required match to federal funds. Together, these dollars support annual grant rounds for salmon habitat protection and restoration projects in watersheds around the state. This funding

FOR INFORMATION ABOUT THESE PRIORITIES PLEASE CONTACT:

Jason Mulvihill-Kuntz, Salmon Recovery Manager, Lake Washington/Cedar/Sammamish Watershed (WRIA 8)
jason.mulvihill-kuntz@kingcounty.gov • (206) 477-4780 • <http://www.govlink.org/watersheds/8/>

is a cornerstone of WRIA 8's annual grant round, yet the funding from the state has been in decline for several years. For 2017 – 2019, the Salmon Recovery Funding Board intends to use a portion of the state funding to support Lead Entities' cultivation and development of priority projects, which is intended to increase Washington's competitiveness for federal PCSRF funds.

➤ **Support the Washington Department of Ecology's (Ecology) original Floodplains by Design agency funding request of \$70 million for the 2017 – 2019 biennium.**

In the past two biennial legislative sessions, the legislature allocated funding to Ecology to support a list of multiple benefit floodplain restoration and management projects, including the following WRIA 8 priorities:

- In the 2013-2015 biennium, King County received a \$4.1 million grant to support completion of the Cedar River Rainbow Bend floodplain restoration project and assist with relocating residents of a mobile home park as part of the Riverbend floodplain restoration project.
- In the 2015-2017 biennium, King County and Seattle Public Utilities received a grant to acquire floodplain properties in priority reaches of the Cedar River and develop final design of the Riverbend floodplain restoration project.
- For the 2017 – 2019 biennium, King County applied for funding to construct the Riverbend Floodplain Reconnection Project on the Cedar River.

➤ **Support Washington Department of Fish and Wildlife's (WDFW) Washington's Wild Future funding request of \$2.72 million to increase fishing opportunities for the 2017 – 2019 biennium.**

Washington's Wild Futures is an initiative designed to address the most important challenges affecting fish and wildlife conservation in the state, based largely on feedback the public provided to the Washington Department of Fish and Wildlife (WDFW). The specific request for \$2.72 million to increase fishing opportunities includes

FOR INFORMATION ABOUT THESE PRIORITIES PLEASE CONTACT:

Jason Mulvihill-Kuntz, Salmon Recovery Manager, Lake Washington/Cedar/Sammamish Watershed (WRIA 8)
jason.mulvihill-kuntz@kingcounty.gov • (206) 477-4780 • <http://www.govlink.org/watersheds/8/>

\$290,700 for Lake Washington Sockeye and Chinook Conservation and would fund monitoring and assessment of predation and other factors limiting salmon survival in Lake Washington in the 2017-19 biennium, as well as support implementation of management actions resulting from a current WRIA 8-supported predation study.

➤ **Support the Puget Sound Partnership’s (PSP) legislative funding strategy for capital actions supporting implementation of the Action Agenda for Puget Sound.**

The overall intent of PSP’s funding strategy is to protect Puget Sound, and funding will support the Partnership’s ability to implement the Action Agenda for Puget Sound, which directly and indirectly benefits salmon recovery. PSP’s salmon recovery habitat restoration priorities may fall more directly under the PSAR program, but the strategic initiatives are an avenue to support stormwater reduction priorities; multi-objective habitat enhancement projects; and integrated water infrastructure projects that address a mix of stormwater, habitat, water supply, and flood protection.

Operating Budget

➤ **Support the Recreation and Conservation Office’s (RCO’s) request of \$907,000 in state general funds to support Lead Entity project development.**

RCO requests state general funds to support the ability of Lead Entities to cultivate and develop projects, and these funds combine with federal PCSRF dollars to support annual Lead Entity grants for project development, grant round coordination, and project tracking. This is the same amount requested in the 2015 – 2017 biennium. For over 10 years, the grant award to WRIA 8 was \$60,000, but for the 2016 – 2017 state fiscal year, the award will be \$45,658 due to declining state contributions and a commensurate decline in Washington’s PCSRF award. The decline in federal PCSRF funds has been linked directly to the amount of project development funds

FOR INFORMATION ABOUT THESE PRIORITIES PLEASE CONTACT:

Jason Mulvihill-Kuntz, Salmon Recovery Manager, Lake Washington/Cedar/Sammamish Watershed (WRIA 8)
jason.mulvihill-kuntz@kingcounty.gov • (206) 477-4780 • <http://www.govlink.org/watersheds/8/>

included in Washington's PCSRF application relative to the other four west coast states, which has increased due to the decline in state appropriations. As a result, the state contribution is necessary to improve Washington's competitiveness for PCSRF, which affects capital and non-capital funding.

Policy Legislation

- **Track and participate in continued efforts to explore new watershed-based funding authorities to support multiple-benefit projects that address salmon habitat protection and restoration, water quality, stormwater management, and flood management.**

Since 2011, recognizing the limited funding available to implement salmon recovery, WRIA 8 supported and participated in cross-watershed discussions to identify alternative funding mechanisms to implement multiple-benefit watershed priorities, including but not limited to salmon recovery habitat restoration, stormwater management, and flood management. These efforts and discussions are on-going and may result in future legislation.
