RE: Lake Washington/Cedar/Sammamish Watershed (WRIA 8) Salmon Recovery Council State Legislative Priorities

Dear Governor Inslee:

On behalf of the Lake Washington/Cedar/Sammamish Watershed (WRIA 8) Salmon Recovery Council, I wish to share our enclosed priorities for the upcoming state fiscal biennium. Your leadership is critical to ensuring we can continue our efforts—and Washington State’s commitment—to protect and restore habitat for salmon listed as threatened under the Endangered Species Act. Additionally, salmon habitat restoration is essential to ensuring the long-term availability of Chinook as a prey resource for critically endangered Southern Resident Orcas. Our priority restoration work also benefits streamflows, supports tribal treaty fishing rights, and makes our watersheds and communities resilient to a changing climate.

The state’s investment in salmon recovery and Puget Sound ecosystem restoration for the current 2017-2019 biennium is enabling watersheds and the region to make significant progress on our highest priorities. Your support for the ***Puget Sound Acquisition and Restoration*** and ***Salmon Recovery Funding Board*** programs helps watersheds enhance our science-based salmon recovery efforts and implement priority habitat restoration and protection projects. Funding in the current biennium for the ***Floodplains by Design*** program is advancing implementation of multiple benefit projects that restore critical salmon habitat, reduce flood hazards, and improve water quality. Thank you for supporting these programs, the results of which are in progress.

Attached are the WRIA 8 Salmon Recovery Council’s priorities for the 2019-2021 biennium. We encourage you to accelerate the progress and momentum for salmon recovery and watershed health in Puget Sound and statewide. Specifically, we ask that you support the following:

- \$88.904 million for the ***Salmon Recovery Funding Board*** capital request in the Recreation and Conservation Office budget, which funds habitat protection and restoration projects statewide, as well as half of the salmon recovery Lead Entity program to coordinate implementation of salmon recovery in local watersheds throughout the state.
- \$79.6 million for ***Puget Sound Acquisition and Restoration*** capital request in the Recreation and Conservation Office budget, which will fund a prioritized list of large salmon recovery projects around Puget Sound and provide funding to each Puget Sound watershed for smaller-scale—but critically important—habitat projects.

- \$70 million for ***Floodplains by Design*** capital request in the Department of Ecology's budget, which will implement a prioritized list of multi-benefit floodplain projects around the state that enhance salmon habitat while also protecting public health and safety.
- \$2.6 million for ***Lead Entity program*** operating request in the Recreation and Conservation Office budget, which continues base funding for Lead Entities to maintain locally-supported, watershed-based salmon recovery in Washington, garnering local support for habitat projects, prioritizing projects to maximize the public's investment, and ensuring investments in salmon recovery are scientifically-valid and efficient.
- \$130 million for ***Washington Wildlife and Recreation Program*** in the Recreation and Conservation Office budget, which supports priority habitat protection.
- \$6.6 million for ***Aquatic Lands Enhancement Account*** in the Recreation and Conservation Office budget, which supports aquatic lands protection and restoration and improved public access.
- \$20 million for ***Estuary and Salmon Restoration Program*** in the Recreation and Conservation Office budget, which supports nearshore protection and restoration.
- \$50 million for ***Fish Barrier Removal Board*** in the Recreation and Conservation Office budget, which supports removal of barriers to fish passage.
- \$60 million for ***Stormwater Financial Assistance Program*** capital request in Department of Ecology's budget to support local stormwater pollution prevention.

WRIA 8 appreciates the challenges involved in making state budget decisions and applauds your leadership. Thank you again for your work to continue Washington State's commitment to salmon and orca recovery, restoring the health of Puget Sound, and working to address effects of climate change.

If you have any questions about projects funded in WRIA 8 or how these priorities advance our salmon recovery objectives, please feel free to contact Jason Mulvihill-Kuntz, the Lake Washington/Cedar/Sammamish Watershed Salmon Recovery Manager, at 206-477-4780 or [jason.mulvihill-kuntz@kingcounty.gov](mailto:jason.mulvihill-kuntz@kingcounty.gov). Thank you for your consideration.

Sincerely,

John Stokes  
Chair, WRIA 8 Salmon Recovery Council  
Councilmember, City of Bellevue

Mark Phillips  
Vice-Chair, WRIA 8 Salmon Recovery Council  
Councilmember, City of Lake Forest Park

Enclosure
