

Lake Washington/Cedar/Sammamish Watershed (WRIA 8) 2022 Four-Year Work Plan Update

Added to Work Plan – Tier 1 Locations

Project Name (Location and Sponsor)	Description
Bear Creek Paradise Lake Acquisitions (<i>Bear Creek – King County</i>)	Acquire land parcels in the headwaters of Bear Creek near Paradise Lake to protect streamflow and water quality onsite and for downstream habitat.
Cottage Lake Creek Weir Removal and Restoration (<i>Cottage Lake Creek – Mid Sound Fisheries Enhancement Group</i>)	Remove privately owned weir (67% passable) on Cottage Lake Creek. Remove bank armoring and floodplain, add LWD, and restore adjacent riparian habitat.
Middle Issaquah Creek Conservation and Restoration (<i>Issaquah Creek – King County</i>)	Protect and restore riparian habitat from River Mile 12.5 to 10.1 to establish a contiguous habitat restoration corridor. Includes acquisition in fee or conservation easements with willing sellers as well as ecological restoration on protected lands including floodplain reconnection projects, natural drainage projects, noxious weed control, and replanting.

Added to Work Plan – Tier 2 Locations

Project Name (Location and Sponsor)	Description
North Creek Streamkeepers (<i>North Creek – Adopt A Stream Foundation</i>)	Install 16 pile assisted logjams (PALS) and/or beaver dam analogs (BDAs) at three locations in the headwaters of North Creek to reduce peak winter flows, increase summer flows, and improve salmon spawning and rearing habitat. This work will be paired with outreach and education to riparian landowners and community members on ways they can improve watershed health.

Other Four-Year Work Plan Updates

- Royal Arch Reach Floodplain Reconnection and Restoration – Phase 1 (*Tier 1 – Cedar River – Seattle Public Utilities*)
 - Updated cost information and corrected table to indicate this is a Tier 1 area.
