The marsh – an important resource
with so much potential!

Salmon, orcas, and other wildlife will thrive because of our community
efforts to recreate a tidal saltwater estuary at the Edmonds Marsh,
leaving a legacy for our children and grandchildren.

PROJECT: Ecological Zoning

A photograph of three women smiling outdoors in winter attire. The woman on the left wears a blue puffer jacket and a green knit beanie. The woman in the middle has long dark hair and is wearing a grey knit scarf. The woman on the right wears a green knit beanie and a green scarf. They are standing in front of a green hedge and a fence, with a purple rectangular graphic element at the top center.

THANK YOU

**WRIA 8 Salmon Recovery Council for recommending grant funding
+ King County Flood Control District for making generous funding available**
